I am skilled in R programming language (e.g.: ggplot2, shiny, tidyverse, tidymodels) and have been using R for 4+ years (this resume was developed in R). I have expertise in statistical modelling, survey development, and applied research. My career objectives are to continue acquiring further proficiency in R, Python, and SQL with a focus on machine learning applications and ambition to become a full-stack developer.

Skills

DATA SCIENCE

- Exploratory data analysis, machine learning and regression analysis {caret, tidymodels, car}, data wrangling {tidyverse}, dashboard development {shiny}, data visualization {ggplot2, plotly}, classification {tidymodels}, computerised text mining {quanteda, tidytext}, continuous deployment {netlify}, reproducibility {markdown, renv, virtual environments}

APPLICATIONS

- RStudio, Visual Studio Code, SPSS, Tableau, Excel, Qualtrics, Affinity Software Suite

LANGUAGES

- R {ggplot2, plotly, Shiny, tidyverse, tidymodels, quanteda, tidytext, caret, car}, SQL {Postgre}, Git {GitHub, GitLab}, Python {pandas}, Markdown {R}, Latex, CSS

Experience

Assessment Systems International a.s.

Remote

SHINY R DEVELOPER

2018 - 2019

- I worked under contract to develop an R application with a Shiny front-end for machine-learning-driven assessment of candidates based on psychometric data, and I,
 - created a proof-of-concept that was accepted for further development
 - wrote the client-side components
 - designed and implemented a web UI in Shiny that enabled interactive navigation through the ML-model-building process and enabled the user to save and reuse the resulting model
 - coordinated project management remotely with the client using agile methodology
- The application drew on R packages to provide feature selection methods, classification and regression algorithms, and ensemble models, specifically elastic net models (glmnet), tree-based models (rpart), support vector machines (svmRadial), random forest (rf), neural networks (nnet), and k-nearest neighbour (knn)
- The application enabled the client to engage consultants with no programming experience and increased the effectiveness of the assessment process

Leeds Beckett University

Leeds, England

PHD SCHOLAR

2017 - ongoing

- My research looked into improving the routine feedback letters with height and weight results delivered to all parents with Reception and Year 6 children as part of the National Child Measurement Programme (the NCMP) in England
- The project engaged multiple stakeholders such as Local Government, Public Health England, and parents, and provided nuanced insights into the NCMP, throughout the project I,
 - developed three complex studies using qualitative and quantitative methods
 - gathered opinions of 92 Local Government Authorities in England about how they use the NCMP and provided the results to the Public Health England as evidence for further improvement
 - prepared cluster randomised controlled trial and stratification procedure with reliance on clustering utilising k-means
 - developed a new version of the feedback letters which resulted in improvement of parental perceptions about the letters
 - used computerised text analysis techniques on a vast corpus of text data. For example, sentiment analysis, topic modelling (LDA), hierarchical clustering
 - used Google Natural Language Processing speech-to-text API to automatically transcribe all the interviews
- I became experienced with content analysis, literature and evidence reviews, and contributed to the writing of reports and journal articles
- I presented my findings at,
 - UKCO, Newcastle upon Tyne, England United Kingdom, September 2019
 - Public Health England Annual Conference 2018, University of Warwick, UK
 - Weight Stigma Conference, Leeds, UK, June 2018
 - UKCO, Newcastle upon Tyne, England United Kingdom, June 2018

Influencer.cz

Prague, Czechia

MARKETING ANALYST

2013 - 2017

- As a marketing researcher executive, I was primarily responsible for the management of social media pages, content creation, and copywriting
- My clients were OZP (the third largest insurance provider in Czechia), BMW Mini (car manufacturer), and Centropol (energy and gas supplier), for these clients I,
 - prepared engaging content for their pages which led to an increase in sales and engagement of the page visitors
 - developed a transparent marketing strategy and content plans that are still used by the clients
 - provided long-term content plans that engaged their customers and facilitated sales
- Some other clients I have worked with were Lexus (car manufacturer), NKC (a non-profit organisation for the representation of woman in STEM), for them I,
 - provided an analysis of their marketing strategy and content
 - conducted customer segmentation using R and latentclass modelling
 - developed descriptive reports using ggplot2 and RMarkdown proposing a suitable marketing strategy

University of Cambridge

Cambridge, England

VISITING RESEARCHER

2015 - 2016

- I joined the Policy Research Group at the University of Cambridge as a visiting researcher under the supervision of Dr Kai Ruggeri. As a member of the group I,
 - developed infographics, reports, and presentations for the Safer Care Pathways in Mental Health Services project supported by The Health Foundation (<https://cli.re/rwmbWR>)
 - assisted with data collection and development of a database containing Issue-Based Industry Collectives in the alcohol industry and their characteristics for Dr Jochem Kroezen (<https://cli.re/Zejkxx>)
 - helped to design the Health@Work (H@W) questionnaire for an organisational setting that aimed to match employees' views on health and wellbeing to those of employers'
 - assisted with data collection of Pro Bono activities of U.S. Law firms for Dr Lionel Paoella
 - attended policy lectures and MBA courses in microeconomics

Junior Research Programme

Europe

JUNIOR DATA ANALYST

2014 - 2015

- I have joined a team of early-career researchers in the position of Junior Data Analyst and collaboratively developed a project focusing on Obesity discrimination in the Workplace supervised by Dr Stuart Flint
- The project was disseminated as a journal article (<https://cli.re/JpW7k5>)
- Our work was featured in the following media
 - <https://cli.re/Qm54PB>
 - <https://cli.re/mqrM2P>
 - <https://cli.re/b1x17e>

Courses

Online

<https://www.datacamp.com>

DATA CAMP

2018 - ongoing

- Introduction to SQL, Python for R Users, Foundations of Inference, Inference for Linear Regression in R, Inference for Numerical Data in R, Inference for Categorical Data in R, Case Study: Exploratory Data Analysis in R, Cleaning Data in R, Structural Equation Modeling with lavaan in R, Factor Analysis in R, Machine Learning with caret in R, Introduction to Machine Learning, Multiple and Logistic Regression in R, Introduction to Importing Data in R, Correlation and Regression in R, Introduction to Data in R, Reporting with R Markdown, Exploratory Data Analysis in R, Data Visualization with ggplot2 (Part 1), Data Visualization in R, Joining Data in R with dplyr, Data Manipulation in R with dplyr, Importing & Cleaning Data in R: Case Studies, Intermediate Importing Data in R, Intermediate R: Practice, Intermediate R, Introduction to R

Online

AGRO CAMPUS OUEST

2017

- Exploratory Multivariate Data Analysis (MOOC) by François Husson, Professor of statistics. The course focused on four essential and basic methods: principal component analysis (PCA) to handle quantitative variables, correspondence analysis (CA) and multiple correspondence analysis (MCA) to handle categorical variables and clustering, and an extension to Multiple Factor Analysis (MFA) to analyse a more complex dataset that is structured by groups

Course

Leeds, England

UNIVERSITY OF LEEDS

2018

- Summer School of Causal inference with observational data: the challenges and pitfalls (5 days course). This five-day summer school offered state-of-the-art training in the analysis of observational data for causal inference. By exploring the philosophy and utility of directed acyclic graphs (DAGs) participants learn to recognise and avoid a range of common pitfalls in the analysis of complex causal relationships, including the longitudinal analyses of change, mediation, nonlinearity and statistical interaction

Course

Cambridge, England

UNIVERSITY OF CAMBRIDGE

2016

- Certified IRT and CAT course using Concerto at Psychometric Centre (3 days course). This course focused on producing online state-of-the-art psychometric tests, as well as an introduction to the Item Response Theory (IRT), Computer Adaptive Testing (CAT), and the open-source online adaptive test development platform, Concerto

Community

Leeds R Meetups

Leeds, England

CO-ORGANISER

2017 - Present

- As an R enthusiast, I have been involved in organising the meetups at Leeds Beckett University, and later in the general area of Leeds
- <https://cli.re/E59kPe>

Qualtrics workshops

Leeds

LECTURER

2018

- Delivering series of free workshops about survey development for research staff at Leeds Beckett University

Education

Leeds Beckett University

Leeds, England

PHD DEGREE, PUBLIC HEALTH

2017 - ongoing

Charles University

Prague, Czechia

MASTER'S DEGREE, PSYCHOLOGY

2013 - 2016

Charles University

Prague, Czechia

BACHELOR'S DEGREE, PSYCHOLOGY

2010 - 2013
